Abstract resin, elephant sculptural centerpiece in antiqued bronze and matte white.

MATERIAL

Concrete*

DIMENSIONS

6"L x 5.5"W x 7"H

SOLD AS

Individually

**Minor cracks and imperfections are to be expected.*

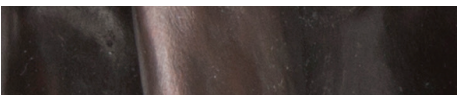

CARE INSTRUCTIONS:

A proper maintenance program is imperative to ensure the longevity of our concrete products. Concrete is porous by nature. It should be cleaned frequently to remove abrasive agents from its surface using only acid-free, bleach-free, neutral pH cleaners designed for cleaning natural stone. Avoid ceramic cleaners, which can stain, damage, or dull concrete, or natural cleaners, which are usually highly acidic citrus-based.

Start with dampening the surface with clear water to keep the cleaning solution from sticking. Remove excess cleaning solution to prevent staining. Wipe up any spills immediately to avoid penetration of the sealer and possible discoloration. Periodically, re-wax the surface to maintain the natural stone finish. When placing objects on the surface, use felt or rubber feet pads. Concrete material naturally distresses, so keep in mind that minor cracks and imperfections are to be expected.
